DUCTOS
GROUP

ENG

the company

Hotel Quinta da Marinha Resort, Cascais

DUCTOS, SOCIEDADE DE PROJECTOS, LDA., started off as a private limited corporation in July 1992, as a result of an already long collaboration between its partners, collaborators and consultants, working together in the preparation and implementation of studies and projects for public and private entities.

Ductos professional and technical staff includes a team of Engineers, who possess qualifications in the several fields of Engineering. Our professional and technical staff are supported by AutoCAD technicians, administrative staff and when necessary, consultant specialists in various subject areas.

With a sustained growth and implantation in international markets, **Ductos** is now known as **DuctosGroup**. With local societies constituted in **Mozambique** and in **Macau**, we also consolidated our position in such significant markets like **Angola, Brasil, Cape Verde** and **Algeria**, where we continue developing studies and projects in several areas.

As a result of **DUCTOS** development and its growing role within international markets, a strategy was defined looking to establish new society constitutions and partnerships in countries which have portuguese as the official language.

By September 2009 **Ductos** was already established in **Angola**, in order to provide a direct response to its customers, projects, and on-going work in this country.

In October 2010, a new office headquarters was open in the City of Praia, Santiago Island, **Cape Verde**, giving response to all the local solicitations..

internationalization

As a consequence of an implemented strategic expansion, and the high volume of business in **Brazil**, **DUCTOS** created a new company with its headquarters in São Paulo.

DUCTOS is also present in **Mozambique**, where in July 2012 established a new society of Mozambique Rights called **Ductos Moçambique**, Sociedade de Projectos, Lda., having its headquarters in Maputo.

In January 2013, has begun the process of incorporating a company in **Macau** designated **Ductos Macau** Engineering, in response to the great challenges of the East.

specialties

Having a group of engineers and technicians with a solid experience in our subject fields, **Ductos Group** provides services in the following areas:

**Hydraulic Installations;
Sustainability;
General Infrastructure;
Basic Sanitation;
Other Specialties.**

in partnership:
